

*At Kalispell Regional Healthcare,  
we're more than just a local  
health care system.*

We represent a full range of health care services designed to meet the needs of community residents, seasonal visitors, and individuals outside our service area who are in need of high-level, affordable care. From preventive medicine, wellness, and routine procedures to ongoing treatment and complex surgeries, Kalispell Regional Healthcare has the expertise and the facilities to improve the health, comfort, and lives of those we serve.

# **KALISPELL REGIONAL HEALTHCARE**

Improving health, comfort and life.

## Cancer Care

Our commitment to providing the very best care possible for people with cancer in this region is evident in our broad range of services. These include programs focused on prevention, early diagnosis, genetic counseling, staging, multidisciplinary treatment planning, research, rehabilitation, surveillance, psychosocial support, and palliative and end-of-life care. Our cancer program is dedicated to eliminating this disease, improving the way we provide care, and providing that care in a continuum that addresses patient needs at every step of the cancer journey.

## Emergency Care

Kalispell Regional Healthcare's emergency services departments and Level III trauma center have a highly skilled team of health care professionals standing ready 24 hours a day, seven days a week. Our staff members are experts in treating and caring for patients who experience trauma, accidents, injuries, strokes, heart attacks and other cardiac emergencies, complications from any serious illness, mental health issues, and more. With our A.L.E.R.T. Air Ambulance program patients are transported swiftly, even from the most rugged terrain.

## Family Health

Compassion, commitment, and capability are hallmarks of the collection of family health services at Kalispell Regional Healthcare. We offer expertise, equipment, education, and facilities to provide the fathers, mothers, daughters, and sons of our region with a full range of family health care services. Whether you live in Polson, Eureka, Lakeside, Bigfork, Whitefish or Columbia Falls, there is a family health specialist there for you. From childbirth and newborn care to mammography and breast health, and from heart care and home health to palliative care, we care for you and your family every step of the way.

## Heart, Lung and Vascular

Every day, Kalispell Regional Healthcare works to keep the hearts and lungs throughout Montana beating and breathing strong. Through prevention, treatment, and rehabilitation, we are helping patients achieve a rewarding quality of life while controlling the negative effects of heart, lung and vascular diseases. From surgery and electrophysiology to cardiac devices and pulmonology, we have you covered through our spectrum of services.

## Neuroscience & Spine Care

Each year, millions of Americans are affected by disorders of the brain and nervous system. The severity often can be devastating. At Kalispell Regional Healthcare, we use modern medical and technological advances to improve the quality of life for patients suffering from neurological disorders, including care for spinal and head trauma. Our nurses, physicians, and allied health staff are dedicated to the physical, mental, and spiritual health of each patient. This care and our advanced technology together support the patient's total well-being — an essential element of the recovery process.

## Orthopedics

By providing personalized, high quality, attentive care and employing innovative technology, Kalispell Regional Healthcare attracts high caliber orthopedic physicians and medical professionals to best serve our patients. Our physician staff uses advanced surgical techniques as well as more traditional methods with long-standing success rates. We listen carefully to determine the best treatment for each individual and his or her unique circumstances. From sports medicine and joint replacement to arthroscopic and general orthopedic surgery, you can trust your care to us.

## Pediatrics

With more than 100 pediatric primary care providers, more than 40 pediatric specialty providers, pediatric acute care (including both pediatric and neonatal intensive care) and a range of outpatient care and support services, Montana Children's is elevating and transforming the way pediatric care is delivered to our region, saving the lives and improving the health of children for generations to come.

## Surgery

For patients requiring surgical procedures, Kalispell Regional Healthcare provides both inpatient and outpatient surgery in a comfortable, accessible setting. Our surgical services staff includes skilled surgeons and anesthesiologists, talented nurses, and highly qualified medical and allied professionals. Our patients reap the benefits of innovation, including robotic surgery and minimally invasive and laparoscopic techniques that speed recovery and reduce pain. Kalispell Regional Healthcare provides an extensive range of surgical specialties.

## Women's Health

Women have gender-specific needs related their physical and emotional well-being. Kalispell Regional Healthcare offers many options that support women in unique ways so you can be the best version of yourself. Services for women include an array of preventive and screening tests such as regular gynecological checkups, mammogram imaging, bone density testing, colon cancer screening, hormonal testing for menopause and more.
